### **Re: Reference for ABA-CON Aviation Services – Burnie Whitten and Ardy Ballard**

To Whom It May Concern:

The Hiller Group Inc. is a national supplier for Chevron Global Aviation and ConocoPhillips aviation fuels to airports, FBOs, corporate flight departments and flight schools. We have been supplying airports and customers fuel, products and services for over twenty-five (25) years.

When Burnie Whitten owned Fuel Tech Inc., located in Mims, Florida, our company and I personally enjoyed doing business with Burnie Whitten and Ardy Ballard, contracting them to provide and repair aviation fueling equipment. They were instrumental to our business in providing excellent service and products to our customers and assisted us in growing our aviation fuel distributorship nationwide.

Since Burnie Whitten sold Fuel Tech, we have not enjoyed the same business relationship with the company. As a result, we sought out Burnie and Ardy when I learned that they were getting back into the contractor work and assembly business for aviation fueling equipment and services. Since that time, I have contracted with them to install several tank and equipment projects. Currently, they are working on three (3) separate projects for our company.

General Aviation is a small industry. I am confident in recommending or referring them for any job that they personally commit to completing in a professional and safe manner and providing quality products and craftsmanship. In addition, I can rely on their word to finish a job to be as good as money in the bank – something even banks can't claim in these times!

I am available at 1-800-544-3835 should you have any questions concerning this reference. Please feel free to contact me at any time to discuss further.

Sincerely,  
THE HILLER GROUP, INC.

To Whom It May Concern

Subject: Burnie Whitten

I have known Burnie Whitten in a professional relationship for over 14 years. In that time I have grown to know him as a complete professional. I consider Burnie a valuable resource and have called on him, literally hundreds of times for his advice and expertise concerning the life blood of my responsibilities, Aviation Fueling Equipment.

I have been working in Aviation related fields uninterrupted for over 40 years and in that time have not known another individual with a more in depth knowledge of Aviation Fueling systems, both fixed and mobile.

Our relationship has continued to be the most professional possible after his brief break from the business, and he has continued to provide background and expertise when needed. Were I to need Burnie's services in the future, I have total confidence that the level of professional and personal support he has demonstrated in the past would most certainly apply themselves again.

Our relationship has provided me personally with a great deal of peace of mind and confidence. He has always been there for me when I needed a hand or advice on a wide variety of subjects, both professional and personal. The end results are obvious; his past customers still believe in the business he built and the products they produced.

His expertise is almost legendary, people always mention his name with the utmost respect. I am proud to consider him a friend and fully support his new venture.
